You may distribute, remix, adapt, and build upon this document in any medium or format, with no conditions imposed.

This bibliography contains Internet-accessible information on data centers, with a focus on citations to works pertaining to Pennsylvania.

A data center is a facility designed to house computer, telecommunications, and storage systems. Data centers are considered critical infrastructure for the secure storage, management, and processing of information.

This bibliography is not comprehensive. Passmore cited these works during personal study.

URLs included with citations were valid when captured. Send revisions or suggestions for new citations to Passmore.

Date of most recent version: 20 March 2026. Updates occur frequently.
